

CREATION | FAITH | SCIENCE | SABBATH | EVANGELISM TRAINING

In a society where implicit trust rests on science to provide answers to life's questions, there is an urgent need for Christian young people to understand not just what the Word of God says about creation, but how to intelligently harmonize faith and science. The Sabbath, God's memorial of creation, is fast becoming a real focal point, and will soon become the last test. We must understand the issues!

Our intellectual society requires an intelligent faith. Main speakers John Bradshaw and Rivelino Montenegro will help you learn how to have solid Biblical and scientific answers to the major questions Christian young people are facing today.

John Bradshaw is the speaker/director for the worldwide media ministry "It is Written". He has been working as an evangelist for Amazing Facts as well as pastoring several churches. During his 15 years of pastoral ministry, John has held more than 80 evangelistic series. For him, nothing matches the joy of introducing others to Christ.

John will emphasize the importance of an intelligent faith in God's Word and creation, and why an understanding of the Sabbath is a relevant issue in our day. He will also share his conversion story from London.

Rivelino Montenegro holds a PhD in Physical Chemistry and conducts research in the following areas: nanotechnology, medical devices, natural polymers and biomimetics. He has given many interviews and written papers that show how modern scientific development supports the Biblical text and the Christian faith.

Rivelino will share fascinating facts that will help you develop an intelligent faith in creation, build both on the Word of God and science.
